Code?

Jeff Thalhammer

(Creator of Perl::Critic)

to speak via videolink at Albany Perl Mongers

Overview

Perl::Critic is a static analyzer that can instantly find bugs, reveal inconsistencies, and enforce best practices in your code. Perl::Critic is a cheap and effective tool for dramatically improving code quality. In this seminar, you will learn how to:

- Use Perl::Critic in several different scenarios
- Convince your teammates to use Perl::Critic
- Find the right configuration for your team
- Write your own custom rules for Perl::Critic

Monday, 26 January @6:30PM
East Greenbush Library
