

## **Intermediate Developer**

### **Key scope for the position:**

- Supports our CTO in core system development, upgrades and delivery
- Supports our CTO in custom software development beyond our core system
- Understanding our core system and its role in supporting business needs
- Working with our customer operations team to follow up on service affecting system issues
- Develop relationships with IT business partners to support quick issue resolution
- Develops a good understanding of Regen products and services
- Team player who wants to be a part of the company beyond the coding

### **Technical skill requirements (min 3 yrs experience)**

- Modern Perl (Moose, DBI) and interest in quality software code
- Strong focus on regression testing and code conventions
- Working on Debian Linux, using Git, MySQL and Jenkins
- Familiar with agile practice such as Scrum
- Experienced in working with high velocity time series and modelling
- Understands main software performance trade offs
- Interface development with third party data providers (eg API, FTP)
- Understand software lifecycle: Development – Staging – Testing – Production
- 1st/2nd/3rd level support experience and experience in service delivery management
- Ideally understand basic IT operations and will be able to contribute to devtool improvements.

Nice to have some or all of these skills:

- Feature & system design
- Services and system administration AWS & Lan
- Database design and patching.
- Release & service delivery management.

### **A bit about the type of person we think would suit the role:**

- Understands the business drivers and end user needs of technology and is competent translating these into viable system improvements with high quality code and minimal defects
- Has good communication skills to communicate clearly about technical topic with colleagues and customers.
- Ideally has a computer science or software engineering qualification.
- You will be a motivated person and pride yourself in your ability to move through tasks quickly and efficiently
- You enjoy being part of a team who work together towards the success of the company
